info@palmexcm.com

The portable toilet cabin is produced using modern equipment by injection molding. This ensures high quality and accuracy of parts, what is important for assembly and operation.

It is entirely made from high quality plastic (HDPE), including the base. Coloring pigments only with high color fastness are used when producing portable toilets : (at least 7 out of 8 points). Therefore, they do not fade for a long time, even in bright sun.

The portable toilet has a vandal-proof door. The reinforced base pallet does not rot and is easy to clean. All this ensures a long service life of the portable toilet and low operating costs.

The door is provided with hidden springs that ensure automatic closing and a lock with (Free-Occupied) indicator.

Toypek

- with sink
- without a sink

ARMAL

- without a sink

- Collection capacity : 250 l
- Weight : 73kg
- (L/L/H) : 100 x 100 x 225 cm

- Collection capacity : 165 l
- Weight : 126 kg
- (L/L/H) : 220 x 160 x 225 cm
